The Hidden Math Behind NSE

Think Smart *Always For* Better Decisions

Retail investors assume a **1% distributor commission** is negligible over time. On a ₹15,000 monthly SIP over 25 years, that 1% fee quietly extracts **₹34 Lakhs** from your wealth.

Distributor Trailing **Commissions Extract** Wealth

Trailing commissions are deducted **every single month** directly from your net asset value. Even during major market corrections, distributors earn guaranteed annuities from your portfolio.

The Compounding *Multiplier Effect* In Action

Money lost to fees cannot compound. A **₹1 Lakh** fee paid today robs you of **₹10+ Lakhs** in terminal retirement returns. Compounding works both ways: gains multiply, fees multiply exponentially.

Regular Plans Offer Zero Incremental Alpha

Regular mutual fund schemes hold the **exact same stocks**, follow the same fund managers, and carry identical market risk as Direct plans. You pay recurring fees for zero added performance.

Institutional Rules *To Protect* Your Principal

Verify every mutual fund in your portfolio has **'Direct' explicitly in its name**. Cap active equity expense ratios under **0.80%** and passive index funds under **0.20%**.

The Pre-Trade **Capital Audit** Checklist

Audit your Total Expense Ratio quarterly. Calculate the **exact rupee commission** paid per year, and switch accumulated units to direct zero-commission platforms to preserve 100% of your compounding capital.
