The Secondary Market Slump

stat_data Nifty 50 Correction Territory India's equity market shows pressure in the secondary market with significant foreign outflows affecting benchmarks after a series of losses.

Primary Market Boom

card_text Even while the main stock index corrects, the primary market—where companies issue shares to the public for the first time—remains very active and successful at raising substantial capital.

Foreign vs. Domestic Money

comparison_data Foreign investors drive all fundraising Domestic liquidity is actively supporting fundraising despite foreign outflows from established index stocks.

Investor Selectivity

checklist_data Checking company valuations carefully Reviewing corporate governance standards Blindly applying to every new share sale

How the *Market Splits*

flowchart_data Foreign outflows hit older listed stocks Nifty 50 enters correction territory Domestic capital flows into new share offerings Companies successfully raise large sums

What Stays Uncertain

card_text While domestic funding is strong right now, investor selectivity on pricing and governance means not every new share offering succeeds equally in choppy market conditions.
