Raids across *29 premises* and Rs

What is *a 'Pump* and Dump'?

card_text It is a scheme where manipulators artificially inflate ('pump') the price of a stock through false information or fake trading volume. Once the price is high, they sell ('dump') their shares to unsuspecting investors, causing the price to crash.

The Scale *of the* Investigation

stat_data The Enforcement Directorate (ED) recently conducted raids across 29 premises in Maharashtra and Gujarat, leading to the freezing of Rs 200 crore in trading accounts linked to these activities.

Why do *accounts get* frozen?

card_text When regulators suspect market manipulation, they freeze accounts to prevent the movement of funds while they investigate. If your money is in an account under investigation, you may lose access to your own capital for an indefinite period.

Myth vs.

Reality

comparison_data Myth: A rapidly rising stock price means the company is doing great. Reality: A sudden, unexplained spike in price and volume is often a red flag for artificial manipulation rather than genuine business growth.

How to *Protect Your* Capital

flowchart_data 1. Ignore 'hot tips' on social media. 2. Check the company's official financial reports. 3. Look for consistent business performance. 4. Avoid buying stocks just because they are hitting new highs daily.

Quick Safety Checklist

checklist_data Does the company have a clear business model? [Pass/Fail] | Is the price rise backed by public financial results? [Pass/Fail] | Are you buying based on a 'tip'? [Pass/Fail]
