PM Modi deepfakes are *fake welfare* schemes

How The Scam Operates

1. Scammers publish an AI-generated video showing PM Modi promising cash aid
2. The post attaches an unverified external link promising immediate enrollment
3. The page asks for personal bank details or an upfront processing charge

How Voice *Cloning Works*

Deepfakes clone voices and lip movements using computer software to make someone appear to say words they never spoke. Just because a video looks authentic on a phone screen does not mean the announcement is genuine.

Official Portals

Versus Phishing

❓ COMMON QUESTION

A video endorsement proves you must pay a nominal fee to unlock your government payout.

✅ SOURCE-BACKED ANSWER

Genuine government welfare initiatives never demand that citizens pay money upfront to receive direct benefits.

Red Flags

Before Clicking

- ✓ Portal domain ends strictly in .gov.in or .nic.in
- ✗ Page requires an upfront payment or processing fee
- ✗ Scheme is only promoted through forwarded social media links

Why Visual *Glitches Vanish*

As video alteration tools improve, visual glitches become harder to detect with the naked eye. Instead of trusting video clarity, cross-check the scheme name directly on official ministry portals.

Reporting Fraudulent *Welfare Clips*

1. Do not submit your phone number, Aadhaar, or bank details
2. Report the suspicious web address to the cybercrime authorities
3. Alert village and family groups before the forward spreads further

Real government aid never charges a fee
