

Market Debunk

#MARKETDEBUNK

The ₹6.80 Cr **Mule Scam**

Arrests don't *mean your* capital is safe

✗ RETAIL ILLUSION

Police arrests in fake director scams mean the banking system is actively recovering retail funds.

✓ INSTITUTIONAL TRUTH

Siphoned capital moves through 10+ layered mule accounts within minutes, exploiting digital KYC latency before freeze orders land.

The true **scale of** synthetic identities

VERIFIED MARKET IMPACT

₹6.80 Crore

siphoned via 12-mule network

A single syndicate utilized fake directors and shell bank accounts to instantly drain capital. By the time law enforcement acts, account balances are routinely zeroed out.

How illicit

capital bypasses

detection

3

The cost **of KYC** verification lag

Digital onboarding systems prioritize rapid customer acquisition over real-time transaction monitoring. Syndicate networks exploit this 48-hour verification gap to run massive volume through shell director profiles before compliance filters freeze compromised channels.

The Non-Negotiable

Firewall Rule

Never link primary savings or wealth accounts to third-party brokers or unverified payment gateways. Maintain a dedicated, low-balance sub-account exclusively for trading liquidity to ring-fence your core wealth from systemic banking vulnerabilities.

Pre-Trade Account

Risk Audit

Primary bank account directly linked to third-party trading portals

Isolated secondary account used exclusively for trading settlements

Automated daily transaction caps enforced on trading accounts

Don't forget to **save & share** this for later
