#MARKETDEBUNK

Why your
FD will
soon disappear

What is **a CAS?**

card_text A Consolidated Account Statement (CAS) is a single document that shows all your investments —like stocks, mutual funds, and bonds—in one place. It is currently issued by depositories like NSDL, CDSL, and agencies like CAMS or Karvy.

The Big Change

comparison_data Currently, your CAS shows: Mutual Funds, Listed Shares, and Bonds. Soon, it will also show: Your Fixed Deposits (FDs).

Why this **matters**

card_text By bringing FDs into the CAS, you get a 'bird's eye view' of your total wealth. You won't have to log into multiple bank portals to see how much you have saved in different deposits.

The Integration Process

flowchart_data Step 1: Depositories (NSDL/CDSL) receive data. Step 2: FDs are mapped to your PAN. Step 3: Your monthly CAS is updated. Step 4: You view your total holdings in one report.

What remains **uncertain**

card_text While the plan is confirmed, the exact rollout timeline and which specific banks will sync their data first have not been fully detailed yet. Keep an eye on your monthly statements for updates.

Your Action Plan

checklist_data 1. Ensure your PAN is linked to all your bank accounts (Pass). 2. Check your email for monthly CAS from NSDL/CDSL/CAMS (Pending). 3. Verify if your active FDs appear in the new section (Pending).
