The Fake *Instagram IPO* Trap

The Pre-IPO

Allotment Myth

Retail investors believe private messaging groups or social ads offer exclusive IPO access. In Sikar, **4 cyber frauds** exposed this illusion. Legitimate Indian IPO allocations occur exclusively via SEBI-mandated ASBA channels, where capital remains blocked in your personal bank account.

How Fake *VIP Allotments* Work

Fraudulent brokers direct victims to transfer funds into personal or corporate UPI accounts under the guise of **100% guaranteed allocation**. Once capital leaves your personal bank via direct transfer, it bypasses clearing corporations and is immediately laundered across untraceable accounts.

How Scammers *Capture Capital*

Real pre-IPO secondary transactions require unlisted share demat transfers via regulated depository participants. Scammers spoof institutional order books using fake dashboards, capturing **100% principal loss** before trading ever occurs on registered exchanges like NSE or BSE.

Understanding Total *Capital Loss*

Yield chasers seeking speculative gains face a complete downside asymmetry: a **100% loss** on unverified IPO transfers requires an impossible infinity return to recover lost principal. Fraudulent transfers completely destroy long-term portfolio compounding velocity instantly.

The Mandatory

ASBA Rule

Never transfer capital directly to third-party UPI or corporate bank accounts for primary equity offerings. Legitimate IPO funds are **strictly blocked** inside your own bank account using SEBI-ASBA until final allotment confirmation occurs.

The Pre-Trade

Verification Protocol

Before allocating capital to any public offer: **1. Verify SEBI registration** of the intermediary; **2. Demand ASBA blocking** through your bank net-banking portal; **3. Reject external UPI links** or private account transfer requests outright.
